

# Stories for Global Citizenship

THE POWER OF NARRATIVE

**Understanding the world through stories:** teaching about sustainability, the SDGs, DEIB and more with stories.

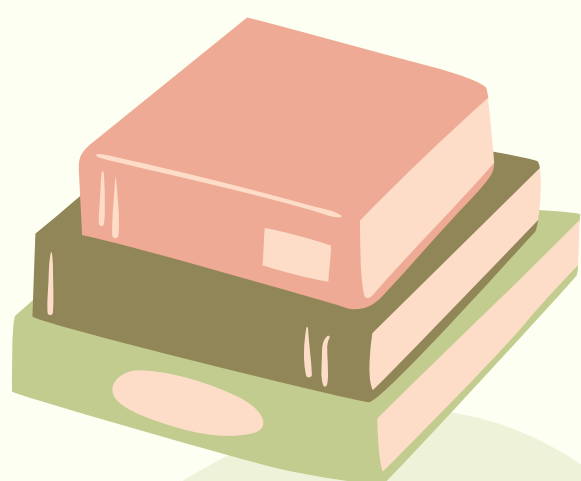

**Active, compassionate listening:**

connecting to peers, community members, family and friends through stories.

**Reflecting on our global citizenship experiences through stories:** writing, podcasting, shooting and editing video, engaging in structured discussions and more.

**Demonstrating** our service, sustainability and global citizenship experiences through **digital storytelling**. This inspires others to think and act, and can be a powerful advocacy tool.

**Building school and classroom cultures that celebrate global citizenship** through digital stories, story events and more.
